ENSO Ice

Product Code: F2B08D

POA

(Ex Tax & Delivery)

Wellness & Aesthetics Technology

ENSO Ice Baths are premium commercial cold therapy systems engineered for performance, durability and strong return on investment. Designed to support everything from home to light commercial use through to high-performance wellness environments, they deliver consistent, hygienic and efficient cold immersion sessions.

Ice Baths are a natural, hygienic and versatile solution for improving muscle recovery

and overall health. Ice Baths can be a quick soak, a full-body immersion for several minutes or soaking one or two parts of the body. Global demand for cold-water therapy continues to grow, often integrated into contrast therapy experiences alongside heat-based treatments.

Designed for both operators and end users, ENSO Ice Baths enhance operational efficiency, improve safety and elevate the overall recovery experience, while adding premium appeal to spas, gyms, wellness centres and recovery studios. Businesses choose ENSO Ice Baths because they deliver commercially as well as physically.
