$8495.00
(Ex Tax & Delivery)

Water Werks

The WATER WERKS Torrent Vichy Shower System is designed for the ultimate combination of rain shower and high pressure massage. The Vichy rain bar provides seven individually adjustable shower heads that allow spa clients to receive a relaxing and therapeutic water treatment.

The attached high pressure Scots Hose allows you to give an invigorating tissue massage with adjustments in intensity.

A variety of treatments are possible with the Torrent system including hydrotherapy, body polishing, body wraps, circulation massage, pressure point massage and skin toning.

The Torrent is the only shower of its kind that allows the massage therapist to walk all the way around the table. Our system offers the most accurate temperature control, seven adjustable shower heads and the most simple operation.
