Portable Manipulation Table

Product Code: D00A01

$760.00

(Ex Tax & Delivery)

OAKWORKS

"The new portable manipulation table from Oakworks® offers an ideal platform for performing thrust and non-thrust manipulation. I didn't think a portable table could ever come close to offering similar stability as an electric high-low table until I used this one. With your eyes closed, you'll have a hard time telling the difference! The table really holds up nicely with thrust techniques, and it's padding is ideal for optimum biofeedback and comfort - not too soft and not too hard. The width of the tabletop facilitates ideal patient positioning and good practitioner ergonomics. The fact that this table is also

easily adjustable up and down is just another added bonus, making this table difficult to resist. We use this table extensively in our Evidence in Motion courses. You can't ask anything more out of a portable table!" John D. Childs, PT, PhD, MBA, OCS, FAAOMPT, President, Evidence in Motion
