(Ex Tax & Delivery)

KURLAND
STORY OF MY NATURE

Mild heat combined with the fragrance of fresh bread baking in an oven makes the Breadbath a truly unique sensory heat experience. Central to the room is a large baking oven and contoured heated seats provide the guests with a comfortable tepid heat which is ideal as part of a heat experience sequence. Some guests prefer less intense heat and for those who like it hot, having rooms to steadily increase the body's temperature is the ideal way to bathe. The bread is an integral component of the experience - not only is the aroma of bread a nostalic aroma for many, the enzymes

released in the sour dough will activate the metabolism and senses. A great thermal room alternative for a spa looking to stand out from the rest!
