Hydrotone L2

Product Code: 3F3434

POA

(Ex Tax & Delivery)

HYDROCO
KNOW THE DIFFERENCE™

Hydrotone L2 Hydrotherapy Bath is a high performance tub with a reclined seating position that is extremely comfortable and saves water. The bathers shoulders are underwater! The tub has 2.2kW Stainless Steel (Cast) wet-end for quiet operation and resistance against slats, muds etc… It produces around 42 psi pressure and up to 450 lpm. Six (6) independent hydro-zones that can be activated independently / collectively.
The CYCLE program that activates the jet zones and cycle over the body.
An Air Injection system throughout the base of the bath – brushless blower motor for long-life operation.
Hand-Wand feature – hand held underwater jet massage

LED RGB (7 Colour) Chromatherapy controlled via the Touch Screen

The Tub sits on a free standing Stainless Steel frame

Al Four (4) panels are removable to gain access underside of tub

All zone valves are 12 VDC actuated Stainless Steel ball valves – very smooth and long life operation

One of the important features is the ‘Sanitizing Flush Program’ that after each bathing session is activated via the touch screen – all jets, pump etc.. are flushed with sanitizer and fresh water. This program runs for approximately 6 minutes.
