HYDRO
KNOW THE DIFFERENCE™

This is the high performance hydro system to compliment any facility. The wall mounted control panel incorporates a high-flow thermostatic mixing valve and flow control, allowing therapists to perform invigorating balanced thermal treatments. Multi head showers can be adjusted from rain pattern to pummelling needle jet pattern, while an overhead drench shower saturates the bather. High pressure cellulite and lymphatic treatments are performed using the Hydrohose, a hand-held hydrojet (scotch hose) - again pressure and temperature control is safely at hand.
