NILO SPA DESIGN

An innovative solution that redefines the wellness experience. The MAREA system introduces dry flotation in an exclusive setting, combining cutting edge technology with absolute comfort through the therapeutic use of temperature. Thanks to a technological core containing up to 500 litres of water, the body is supported evenly, counteracting

the force of gravity without the need to undress or get wet. The client enjoys the immersive experience of water whilst remaining perfectly dry, enveloped by a personalised thermal wave that acts deeply.

A bespoke sensory experience. Whether you choose the embrace of warmth to melt away tension and promote immediate relaxation, or the regenerating intensity of cold to tone and restore energy, MAREA induces a profound sense of physical and mental well-being. The treatment reduces accumulated stress, promotes muscle recovery and helps improve the body’s systemic balance.

MAREA fits perfectly into the modern Longevity framework a holistic approach aimed at slowing down the biological clock and enhancing life quality through advanced bio-hacking technologies. By managing inflammation, cortisol levels, and cellular stress, MAREA acts as a powerful tool for long-term health and vitality.

Discover the power of 5°C cold therapy without ever getting wet. This non-invasive treatment uses a patented membrane to cool the skin, stimulating the immune system and metabolic functions. It is the perfect solution for rapid muscle recovery and skin rejuvenation, offering professional-grade results and anti-inflammatory benefits in a comfortable zero-gravity environment. It also improves sleep quality. Recommended for a 10 minute individual session, as part of a treatment package or in relaxation/fitness areas.
