Salina Thorn Room

Product Code: 4E7B4F

POA

(Ex Tax & Delivery)

KURLAND
STORY OF MY NATURE

The Salina Thorn Room consists of a wooden rack filled with white thorn twigs. Historically it was used by salt mines to increase the salt concentration in the brine. The brine would flow down the white thorns and the water would be evaporated by the wind and sun with the impurities being caught in the twigs. In its modern format, Salina Thorn Rooms are used for inhaling salt-enriched air. Minerals are dispersed into the air soothing the respiratory tract and creating a feeling of wellbeing. With time as your Salina Thorn matures, beautiful white crystals collect on the white thorn twigs creating a visual and effective experience for your guests.
