RLX Aurasans Experience Lounger

Product Code: 589CAE

POA

(Ex Tax & Delivery)

METAWELL

Go beyond the ordinary. Go where landscape and dreamscape converge.

Designed to be a distinct and deeply immersive wellbeing experience, this luxurious lounger delivers the magic of music and pulsating haptic sensations, to elevate and transport you to another dimension.

Choose carefully curated experience programs or your favourite music to take you on a journey of altered reality.

The combined auditory and specifically targeted haptic sensors will leave the Wellness seeker wanting to come back again, and again.

The unique patented technology includes 28 transducers that are integrated into the lounger and controlled by the AURASENS module. The position of each transducer in the upholstery is marked with embroidery, to ensure the perfect position for the optimal transmission of sound and vibration.

Wearing headphones, you’re completely immersed in the sensations of the Gharieni AURASENS module while lying on the RLX Experience lounger. All programs are controlled with an iPad.
