KURLAND
STORY OF MY NATURE

The Haslauer Steambath with its integrated herb evaporator is the modern interpretation of the original Steambath. The extraordinary effectiveness of the steambath is created by the interaction between steam, natural herbal scents and the heated seating area. Our Steambaths are created with water & steam proof cabins and benches and are built to last. The design will be tailored to your requirements using finishes and lighting of your choice. Pleasant temperatures of 43-46° C / 109-115 °F are standard within the Steambath with high humidity,and herbal aromas, working alongside

soft lights and relaxing music.
