Flow System

Product Code: 89D641

POA

(Ex Tax & Delivery)

art of cryo

The innovative Art of Cryo Flow System with ADFT is a unique treatment system for passive training at different performance levels. It generally promotes the stimulation of "flow" in the body. The flow is directly stimulated from the tips of the toes up to the ADFT locking mechanism on the lower rib cage. Indirectly the Flow System also activates the not directly treated parts of body.

The "flow promotion" is natural, purely mechanical, contactless, even distributed, powerful and beneficial.

"Swollen feet after a long flight and no chance of getting into your ankle boots?" One round of Flow System and the problem is solved.

The ultra-modern Flow System works with the innovative ADFT (Alternating Deep Flow Technology), in which alternating overpressure and under-pressure ensure optimal results.

For professional sportsmen and similar trained person or after more than twenty Flow System Trainings the code-protected power levels are open with unprecedented performance.

Longevity: Optimization of the ABI (Ankle-Arm Index) after just one or a few treatments in people with a sprain.

Improvement of the body contour.

Promotes decongestion and lighter legs.

Supports a better complexion.

Increases vitality.

Promotes performance.

The unique Art of Cryo System Software enables the Flow System to adapt treatments to the individual goals and needs of each user.

Features:

- 6 Target Areas, 30 Treatment levels inc 11 code protected power levels
- Treatment times of 5 - 24 minutes
- Part of the Art of Cryo Tec-Spa Module along with MCS and Vaultz Cryo Chamber or as stand-alone
- Customised Software guided programs
- Free software updates
- Stable treatment position with extendable poles
- Easy to move using castors
- Exclusive carbon finish by Capristo

Specifications:

- Pressure levels of 1 to 40mbar
- Negative Pressure of 0-120mbar (+100%) powered by ADFT (Alternating Deep Flow Technology)
- Complete Siemens SPS Control
- Requires W-Lan or Lan
- Size: 460L (+35%), diameter carbon-corpus 700mm
- Electrics: 230v/50-60Hz
- Weight: approx 130kg
- Size: 2300mm - 3050mm L x 720mm W x 1350mm H
- Manufacturers warranty: 2 years
- Certifications: CE; ISO/EN9001
