Clinician Adjustable with Lift-Assist Backrest Top

Product Code: AF897A

£1410.00

(Ex Tax & Delivery)

OAKWORKS

The Clinician™ Series just got better, and now comes standard with a removable and replaceable padded top. The Lift Assist Backrest Top allows you to easily and quietly adjust the incline of your table so that you can perform a wider range of procedures. Since the client doesn't even have to move during the adjustment process, the flow of the treatment session is maintained, and the client can remain on the table. The secret is the hydraulic gas cylinders that you control with easy to reach finger controls, putting the power to make table top adjustments at your fingertips. This manually adjustable

spa table saves electricity, and the strength of Oakworks' Interlock leg extension system gives you the stability that guarantees you and your client's peace of mind. The Adjustable Lift system is the most economical choice for your practice, and it features an open shelf underneath to store all of your massage equipment and accessories. The Oakworks leg extension system uses one adjustment knob instead of two, making adjustments easier without compromising the strength or integrity of the table. The knob itself is reinforced with a t-nut and surrounded by a padded rubber grip that is designed to resist dirt and oil accumulation. A convenient storage shelf provides the perfect place for accessories, lotions, oils or anything you need close at hand. Upgrade to the optional cabinet allowing you to choose door designs to create exactly the look you want.
