ISO BENESSERE®

HOLISTIC MEDITATION CHAIR

FOR BALANCE, COMFORT AND AWARENESS

ZENZONE is a holistic meditation chair designed to transform the act of sitting into a complete experience of balance, comfort and awareness. More than a conventional

meditation seat, it creates a dedicated personal environment for meditation, focused breathing, mental recovery, reading and reflection. Its enveloping geometry combines active ergonomics with Feng Shui-inspired design, creating an intimate and protected space that encourages a deeper connection with the practice.

Made in Italy, ZENZONE brings together a solid wood structure, high-performance upholstery and seven natural crystals, each associated with one of the seven chakras. Posture, material, energy and ritual come together within a distinctive architectural presence conceived to support physical, mental and energetic balance.

Every element is designed to create a more intentional experience — a place to slow down, reconnect and simply be.
