Outdoor Sauna

Product Code: B513E7

POA

(Ex Tax & Delivery)

KURLAND
STORY OF MY NATURE

The Finnish Sauna is a hot air bath with temperatures between 80 and 100 °C (176 and 212 °F) and a relative humidity of 3 to 8 %. The seating area is traditionally situated in tiers around the sauna oven. Our Saunas can be operated in different ways, depending on your requirements, e.g. as a Finnish Sauna, a Bio Sauna, a Vitalizing Herbal Bath or as a Hot Air Bath - each with various temperatures and humidity. Each room is created specifically for your space and needs with a large selection of wood finishes, lighting options and room shapes available. We can design and build the complete interior and

exterior cabin or install within an existing structure built by others.
