Steam & Ice Bath (Prissnitz Bath®)

Product Code: C2BF02

POA

(Ex Tax & Delivery)

KURLAND
STORY OF MY NATURE

Too much heat can have a negative impact on the body and its widely acknowledged that its essential whilst bathing to cool down between heat experiences. The Prissnitz Bath®, named after the guru of water therapy, Vinzenz Prießnitz, allows the guest to both heat and cool in the comfort of one room. Between periods of heat generated by steam, intervals of cooling occur either through refreshing water or ice showers distributed via a ceiling fan (depending on the operators settings). This hot and cold alternating action will assist the immune system and introduce a unique yet effective

wellbeing experience to your facility and guests.
