MANICURE-PEDICURE Chair

Product Code: CBD8F8

£2235.00

(Ex Tax & Delivery)

esthetica
Spa & Salon Furniture

The Mani Pedi Chair is Esthetica's no-plumbing manicure and pedicure chair — designed to give spas and wellness centres the flexibility to offer pedicure and manicure services without the need for any plumbing connection. Built on a natural wood veneer and powder-coated mild steel frame, it combines a clean, refined aesthetic with practical, well-considered functionality. A lockable gas spring-assisted backrest allows therapists to position guests comfortably across both treatments, while foldout wooden armrests

extend the chair's capability to manicure services without any reconfiguration. The solid surface top is precision-cut on a CNC machine, and the corrosion-resistant SS 304 grade steel footrest provides a durable, hygienic surface for pedicure treatments. An optional decorative sink — available in copper, stainless steel, antique brass, or antique bronze finish — completes the setup with a touch of considered luxury.
