Posture Knee Stool

Product Code: F46D2B

$180.00

(Ex Tax & Delivery)

Help improve your posture with this ergonomic design, professional quality, orthopaedic,

posture chair.

Kneeling chairs are designed to maintain the natural curve in your lower back thus easing the compression that can be caused by sitting in one position too long. Use of a kneeling chair can help improve posture and, in turn, reduce lower back pain.

This type of seat promotes active sitting via upper body balance and control and encourages the user to engage abdominal and back muscles.

This posture support kneeling stool is used by some clients to perform pedicures.
