Halo Compact

Product Code: F88151

£10760.00

(Ex Tax & Delivery)

HALO COMPACT is a unique freestanding wellness cube designed as both an architectural centerpiece and a complete multisensory system for salt rooms, spas, medical spas, hotels and private wellness interiors. Clad in illuminated Himalayan salt bricks, it generates a fine saline mist while integrating atmospheric lighting, aroma diffusion and sound into a single compact structure.

Positioned at the center of the room, HALO COMPACT transforms the space visually and sensorially, creating an immersive environment for relaxation and wellbeing. When connected to the optional radiant heating panel, the system also allows temperature management, completing a refined wellness experience that combines salt mist, light, aroma, sound and warmth
