

A8 Pro Pilates Reformer

Product Code: 43CFCD

\$2650.00

(Ex Tax & Delivery)

Align-Pilates

This is the low leg version of the A8-Pro reformer, although the legs are interchangeable this comes supplied with the lowest of the three options at 28cm. Low leg reformers are good for studios with low ceiling heights and are popular for group classes, they are also more easily stacked.

The Align-Pilates A8-Pro Pilates reformer is brand new for 2020 and is the updated version of our flagship commercial Pilates reformer, the A2. The A8-Pro has a completely new runner profile and runs on 8 PU wheels (rather than 4 nylon wheels of the preceding A2 models), this new platform offers a quieter ride, improved handling of cross loading forces and reduced maintenance. The A8-Pro also features our new patent pending Rapid Change spring bar for the fastest spring bar adjustment on the market and a host of other subtle improvements, to make the A8-Pro the new star in the Align-Pilates lineup!

Offering refined performance, extensive adjustability, a luxurious oversize carriage and the longest travel of any standard Pilates reformer on the market! Now in it's fourth generation the A8-Pro is the result of over eight years of development. This reformer bundle comes with the low leg height of 28cm, but there is a choice of 3 interchangeable leg heights, the others being: rehab leg (64cm) and standard legs (42cm), making the A8-Pro a truly future proof and versatile investment. The A8-Pro has been designed for both studio, rehab and private use, with the innovative design offering a host of easy

adjustments to provide complete flexibility in use. The A8-Pro Pilates reformer can be stacked (though it is heavy) and has wheels for easy movement.

Though the A8-Pro has some significant differences to its predecessor the A2 reformer, it is visually very similar and is the same size. It also uses all the same accessories as the previous A2 models so that the A2 & A8 can easily coexist in the same studio.

The A8-Pro now benefits from off-centred shoulder rests to give a choice of shoulder widths, a new Gondola pole holder (not included as standard)

Features:

- ✔ Longest travel of any standard Pilates reformer at 113cm - suits more people & requires less adjustment
- ✔ 8 wheel system for improved performance & reduced maintenance
- ✔ Oversize lockable foot bar with improved pivot point for comfort and stability.
- ✔ Heavy duty construction with 150kg maximum user weight
- ✔ Stackable for easy storage (though weight is a consideration)
- ✔ Off centre shoulder rests for choice of shoulder widths
- ✔ Includes foot strap & fluffy
- ✔ Wider & longer carriage (67cm x 90cm) for improved comfort and to suit more body types than other reformers.
- ✔ Convenient - Wheeled for easy moving and can be stacked.
- ✔ A8-Pro Foot bar locks in 6 positions including flat.
- ✔ Stainless rope risers for rapid adjustment of rope heights. Risers fold down for use with half cadillac. Risers feature an eyelet so springs can be attached for additional exercise possibilities.
- ✔ Adjustable feet to ensure the reformer sits flat and runs true even on unlevel floors.
- ✔ Widest carriage on the market at 67cm for greater comfort
- ✔ Rapid change spring bar with 4 spring bar positions
- ✔ Interchangeable legs for future flexibility - choice of 3 heights - Required - see below
- ✔ Improved single adjuster for both ropes & new rapid set up rope controllers
- ✔ Silent system:patented silent pulleys, and metal free, ropes and handles
- ✔ Hooks to hold a Gondola or Maple pole under the runner
- ✔ Market beating 113cm of smooth and quiet travel. More travel means less adjustment and easier transition between exercises.
- ✔ Future proof - Choice of 3 interchangeable leg heights
- ✔ Rapid change spring bar allows single handed adjustment of the spring bar without removing any springs - 4 positions (20cm of adjustment).
- ✔ Removable & lockable shoulder rests allow for a completely flat bed using the optional mattress convertor.
- ✔ New and improved locking rope adjustment system ensures both ropes stay the same length.
