Align-Pilates

February 2020 sees the launch of the latest C Series reformer, the fifth generation C2-Pro RC. The new model builds on the excellent reputation of our best-selling C2-Pro reformer, with the introduction of our new patent pending Rapid Change (RC) spring bar together with a host of refinements to enhance the machines excellent Studio credentials.

The rapid change spring bar, radically alters the ease and speed of adjusting your reformer, which is particularly beneficial in the group class environment, where the C2-Pro RC excels. The spring bar can be adjusted, with springs attached, with a one hand in a single action saving up to 12 additional actions compared with most standard reformers - watch a video of the new spring bar in action here! The C2-Pro RC is stackable and can free-stand.

Please note the Gondola Pole is not included and shown for demo purposes only.
