

Steriliser

Product Code: 444179

POA

(Ex Tax & Delivery)

The instrument sterilizer uses the UV-C disinfection technology combined with the nebulisation of liquid disinfectants, based on quaternary salts, for a complete sanitation of the work tools. This "cold" technology is specific for the disinfection treatment in salons or spas where the autoclave is not present. Ideal for temperature sensitive items (i.e. brushes, combs etc). Large dimensions.

The device is also designed to be installed on a service trolley or to be placed on the various work surfaces.
