

ENSO Float

Product Code: A703F8

POA

(Ex Tax & Delivery)

The Largest, Most Comfortable & Hygienic Float Tank on the Market

The ENSO Float Tank System is a commercial flotation and sensory deprivation system engineered to solve many of the operational challenges associated with floatation therapy. It delivers an elevated, low- maintenance wellness service designed to generate recurring revenue.

You are supported well beyond installation. From team training and operational guidance

to launch marketing assets and pricing insight, the team help you position and monetise your float offering with confidence. Because the right system, properly supported, performs better commercially from day one. Includes:

- * Pre-installation planning guidance
- * Technical setup and commissioning
- * Ongoing servicing and aftercare
- * Optional marketing and launch support

Features:

Largest internal float area of any tank on the market accommodating users up to 2.25m tall.

Full height entry giving improved accessibility

Hoist accessibility for those with limited mobility

Passive ventilation for a fresh, light, non-humid experience

Centrally positioned, super-sized automatic door with a low threshold, allowing users to enter comfortably without the need to bend or climb.

High spec lighting & music

Non-slip surface on internal floor

Light & Attendant Call Button

non-drip design

Easy to clean internal surfaces

Reduced evaporation & heat loss

Fast turnaround - an empty tank when customer is finished means it is quicker to clean

Reduced heat loss when the ENSO is not in use reduces the heater running time and electricity usage.

Less water evaporation when the ENSO is empty means lower water bills and less time filling up the levels.

Automatic dosing allows you to safely dose your ENSO tank with the click of a button at your operating location.

Adding Epsom salts to your ENSO tank is easier than ever. The large access door makes the addition of salt easy, and a specialised mixing mode ensures the salts are quickly dissolved in the solution.

Remote diagnostics
