KURLAND
STORY OF MY NATURE

It awakens emotions! With the Raindrop Fragrance Lamp, you can take your customers on a unique journey: fragrances awaken memories and emotions. When the fresh fragrance of our lemon essential oil wafts through the room, your customers may be transported back to their childhood – when they could drink home-made lemonade on grandma’s veranda. Or perhaps they will be mentally strolling through wonderfully aromatic lemon plantations of Italy. Fragrances for every mood. Choose from our broad range of natural fragrance oils and determine the right fragrance experience and mood you want to create in your rooms – for treatment rooms small and large, hotel rooms, and work areas of up to 80 m2. High-quality design made of wood and glass The body of the Fragrance Lamp is made of solid wood with a refined diffuser attachment made of glass. Automatic switch-off and colour-changing LED lighting powered by plugging in to an everyday socket.
The glass attachments can be ordered individually. For practical storage, we also offer a wooden stand. This makes it easy to change the attachment and fill it with any of our other fragrance oils
