

Rotundus

Product Code: C2A788

William Holland baths and basins are handcrafted from copper and brass with each individual piece taking our skilled craftsmen up to 120 hours to create. The baths are surprisingly light with a standard sized bath weighing only 45kg. Depending on your personal preference the bath can then be sealed with a durable coating to maintain the lustre or if you prefer we can finish your bath from a palette that includes tin, nickel, enamel, patina and even silver or gold. This vast array of finishes coupled with matching taps and accessories allows your copper bath and basin to sit comfortably in either a traditional or contemporary interior.
