Radiance PT™ Pulsed LED Light Therapy Treatment Table

Product Code: DC4F82

$23500.00

(Ex Tax & Delivery)

LEC is proud to introduce the Radiance PT™, the industry’s first multi-purpose Pulsed

LED Light therapy treatment table. The Radiance PT makes it easy to utilize Celluma®'s FDA cleared LED light therapy into face and body treatment protocols to dramatically enhance guest benefits and experiences.

The innovative Radiance PT treatment table incorporates proprietary neck and low-back LED light panels, a large flexible treatment pad, as well as a curved facial and scalp hood. Five (5) FDA cleared light therapy treatment options include pain management, inflammation, body contouring, wrinkle and skin repair, and hair restoration. Each incorporates wavelengths of blue, red, and near-infrared light energy simultaneously emitted in proprietary combinations to achieve maximum restorative results. Impressive treatment versatility enables spas to maximize its profitability with a wide range of attended and unattended treatments.

Easy to incorporate, FDA Cleared Pulsed LED Light Therapy with five (5) Treatment Modes

The Radiance PT treatment table features five (5) FDA cleared treatment modes including pain management, body contouring, wrinkle reduction, hair restoration, and acne treatment. The Radiance PT utilizes convenient, face, neck, lower back, and body devices for easy, effective use. The dynamic LED light system uses specific wavelengths of light energy to improve cellular health by accelerating the repair and replenishment of compromised tissue cells for enhanced results.

Augmented Body Treatments using Pulsed LED Light Therapy

Incorporate our LED low back, neck and body panels to help relieve arthritic pain, joint pain, stiffness, muscle cramps and spasms. The clinically proven therapy has been proven to reduce inflammation & increase circulation.

FDA Cleared Body Contouring

This treatment option focuses on reducing cellulite in targeted areas of the body. Red

and near-infrared light activate adipocytes (fat cells), creating temporary pores in the cell membranes. During treatment, fat lipids empty out into the interstitial fluids of the body and are excreted through the body's normal metabolic processes. This results in smaller fat cells, and a slimmer you.

Augmented Facial/Skin/Hair Treatments

LED red light therapy has been clinically proven to reduce fine lines and wrinkles, improve skin texture and appearance, and enhance repair and recovery after facial treatments. Our anti-acne mode kills body acne and prevent breakouts. Finally, our LED head shield can also be positioned for hair restoration.

Versatile, Multi-purpose Treatment Table with Unattended Treatment Capability

Maximize your treatment room utilization with the Radiance PTs versatility for body treatments, facials, or traditional massage. LED light therapy may be offered in either attended or unattended modes. Independent controls offer a variety of treatment combinations to enhance the treatment menu.

Unsurpassed Comfort

Unlike other single purpose designs, the Radiance PT offers the unsurpassed comfort of LEC’s award winning 5.5” Strata™ Cloudfill II™ mattress with its proprietary four layer-memory cushioning system with a Therma-Soft™ dual zone integrated table warmer.

Electronically Adjustable Mattress, Extended, Height Range

Wireless electronic touch controls enable micro adjustments to the treatment table for perfect ergonomic positioning for clients and therapists alike. From 22” to 38”, the Radiance PT features one of the largest height ranges of any treatment table in the industry.

Stunning, Brushed Aluminium Cabinet with Back-lit Corian® Accents

We made a statement with our ultra-modern brushed aluminium cabinet with back-lit “Cirrus” Corian marble. A hidden slide our drawer conveniently stores our LED body and face pads when not in use.
