

Warmed Pink Salt Wall

Product Code: F128DB

\$5195.00

(Ex Tax & Delivery)

WARMED PINK SALT is a salt wall that combines the benefits for heat with the healing properties of Himalayan salt and colour cycles. It consists of bricks made from pure Himalayan salt, backlit and equipped with a powerful infrared heating system that activates the hygroscopic properties of the salt, warming the environment and ionizing

the air.

WARMED PINK SALT is easy to instal, with a total thickness of only 12cm, self ventilated and requiring the minimum of maintenance. On the back of the brick columns there is a sophisticated LED lighting system that allows for soothing colour cycles, controlled by a remote. It can be synchronised with other Iso Benessere equipment.
