

Airfree Iris 150

Product Code: F8817E

POA

(Ex Tax & Delivery)

Like all Airfree air purifiers, the Airfree Iris 150 uses a highly effective sterilisation concept that works in a similar way to boiling water. When water boils, the germs contained in it are killed. The Airfree Iris 150 with its unique and patented technology applies this principle to indoor air. The polluted air enters the interior of the Airfree Iris 150 by convection. There it is heated to approx. 200°C in the ceramic core and all organic components are destroyed. No new particles are created during this process. The cleaned air is cooled down before it leaves the device. Therefore, the air purifier does not change the room temperature or humidity. The Airfree Iris 150 has a blue anti-stress light that wraps the room in a pleasant colour. Therefore, this air purifier can also be used as a night light.

The Airfree Iris 150 is characterised by many advantages. The device does not need any filters at all, so that you do not have to plan for follow-up costs due to additional purchases of filters. In addition, the room air cleaner is completely maintenance-free and does not need to be programmed or supervised. Its safe technology allows the unit to remain in operation 24 hours a day, even when you are absent. This is also made possible by its low power consumption. The noiseless technology of the Airfree Iris 150 does not disturb in any situation, not even when sleeping. The destruction of air pollutants using heat is considered to be particularly effective and environmentally friendly - no waste is produced, no chemicals are used and even chemical-resistant pollutants can be effectively removed.

Enjoy clean air without side effects!

What Airfree® destroys:

- Mould and mildew
- Viruses
- House dust mites and allergens
- Animal hair allergens
- Organic odours
- bacteria
- Ozone (O3)
- Pollen

Features:

- ✔ Exclusive TSS technology eliminates allergens, viruses, bacteria, pollen and mould spores
- ✔ Completely silent
- ✔ Small, energy saving, with overheating protection and automatic switch-off
- ✔ Ideal for rooms of max 60m2
- ✔ Perfect for use in treatment rooms, offices and lounges
- ✔ No maintenance required
- ✔ No ozone or ion release
- ✔ Blue night light (can be switched off)
- ✔ Tested worldwide by independent ISO laboratories
- ✔ With colour change mode, choose from 10 colours or random mode

Specifications:

- ⚙ Diameter: 21.5cm
- ⚙ CE Marked
- ⚙ Height: 26.5cm
- ⚙ Warranty: 2 years
