

Compact Heated Lounger

Product Code: FAA28E

\$3750.00

(Ex Tax & Delivery)

Thermal lounger for relaxing or resting areas, particularly suitable to combine with the use of sauna, steam bath, and hydrotherapy sessions. Made of phenolic marine grade plywood structure and high pressure laminate (HPL) sheeting covered in 25 x 25 mm

gloss mosaic tiles using highly effective elastic and impermeable adhesive. Its lumbar support will adapt perfectly to people with different heights. A height of 40 cm from the ground at its lowest point makes the access ideal to lay down and to get up comfortably. All measurements and inclinations of the lounge are designed for a perfect adaptation of the body to the lounge, the legs are raised above the height of the heart and that is no coincidence. The heart sends the blood to the feet, but that blood must return, this return is not easy because it is counter-gravity and the blood accumulates in the legs causing problems. With our lounge design and inclinations, we can improve circulation.
