Welcome to our latest brochure for BC Softwear, which has been a joy to compile.

We went on location to Turkey, the origin and heartland of BC Softwear and a stunning backdrop for our products. We are sure you will agree that this brochure brings a flavour of the luxury and quality that so many of our clients have come to know and love, but more importantly a sense of sheer sensation of pleasure that is felt by everyone that wears and uses a BC Softwear bathrobe or towel.

Best Wishes,

Barbar Cole

BC Softwear are suppliers of luxury spa linen, bathrobes, towels and slippers for the finest hotels, luxury spas and laundries across the UK and Worldwide, where longevity of product together with prompt delivery service are of prime importance.

We have an enviable reputation for the highest quality towels and robes that stay softer and fluffier for longer than the average towelling product in the market place.

We are very proud of our Turkish heritage and the pure cotton used in all our towelling. Our quality control measures in Turkey are second to none with independent quality checks carried out at every stage of the manufacturing process.

By purchasing a BC Softwear product you are assured of receiving a quality product every time you order.

ECO-FRIENDLY PRODUCTION

BC Softwear as a leading and innovative company in the textile industry, is aware of its responsibilities for the environment. Our main factory in Turkey is similarly aligned with a comprehensive program investing in environmental friendly technologies all aimed at reducing harm to the environment. They can specifically be seen in:

WATER

The factory has a biological waste water treatment plant and it can reuse 10% of its own total waste water.

CARBON DIOXIDE REDUCTION

Recently the factory has started working on reducing Carbon Dioxide footprint and the 'Greenhouse' effect in accordance with goals to help the struggle to reduce global warming and climate change through international climate change regulations.

SOLAR ENERGY

The factory has installed Solar Power plants on fields and factory roofs and uses its own clean energy to produce our textiles.

CLEAN ENERGY

The factory prevents natural gas consumption of 2.465.223 m³ yearly, by using clean energy produced at solar power plants. Another advantage of the solar plants is to reduce carbon dioxide emitted to nature and the factory is preventing a potential 20.000 tons of CO₂ emission.

PROTECTING AND SUPPORTING WILDLIFE

The reclamation of 1,430,727 trees have been provided by our Solar Power Plants, and therefore, by replanting of 28,000,000 square meters area (an area larger than 8 times Central Park) we are supporting and promoting the protection of animals in their local habitats.

HOME GROWN COTTON

In order to reduce the carbon foot print even further, our factory is growing its own cotton, relying less and less on imported yarn.

ABOUT OUR RESEARCH AND DEVELOPMENT TEXTILE CENTRE

Our Turkish factory's R&D centre was established in 2014 with the primary strategy being to protect and develop our competitiveness, with innovative and technological textile products and the secondary strategy being to develop environmentally friendly R&D projects.

In the R&D Centre Textile Laboratory, we are able to perform fastness tests (perspiration, washing, rubbing, etc.), yarn tests (yarn strength, etc.), colour measurements (spectrophotometer) and physical fabric tests (weight etc.)

BC Softwear also frequently uses the independent laboratory in the UK, Laundry Technology Centre (LTC), to perform tests on our products, specifically to help reduce laundry energy savings, drying times, and enhance longevity. We also work together with laundry equipment suppliers and chemical detergent providers, to ensure the right combination of laundry temperatures and detergents are used to enhance our products, and ensuring we work in partnership.

ETHICAL TRADING

BC Softwear is very conscious about ethical trading conditions, and will only source products from suppliers who have the right working conditions and respect their workers' rights. This is done through regular factory visits, and developing a close working relationship with the founders of our factories.

" All our packaging including polybags are recyclable"

Proud to support the Better Cotton Initiative making global production better for people who produce it. Better for the environment and better for the future of the textile industry.
