Relaxation for Body
& Soul

Non-contact massage

A unique massage experience

Back problems and stress are widespread health issues that more and more people suffer from. The dry-water massage of Wellsystem Hydrojets relieves tension and helps to retain fitness in a relaxed manner. With Wellsystem Spa the massage evolves into a holistic wellness experience. For a soothing break from everyday life and long-lasting positive effects. With the market leader Wellsystem you benefit from over 25 years' of experience, reassuring quality "Made in Germany", innovative technologies and a service you can rely on.

Stress, bad posture at work and lack of exercise are causing more and more people to experience tension and pain in their neck, shoulders and back. Wellsystem's dry water massage uses heat and water power for a relaxing full, or partial, body massage.

Warm water jets hit the underside of the soft natural rubber surface in even movements. They massage the body from head to toe while you float almost weightlessly on the dry water surface. The soothing warmth and gentle power of the water activates the deeper tissue layers and loosens the entire muscle system. The contactless dry water massage is exceptionally hygienic and an ideal supplement or alternative to manual therapy.

Release tensions

The intensive massage works into the deeper layers of tissue, loosens tension and can assist with muscle pain relief.

Relaxed fitness

To warm up or relax after training, the muscles are effectively loosened by the warm massage.

Switch on to switch off

A 15-minute session reduces stress, increases well-being and quite simply is good for you.

Fill up on new energy

The dry water massage improves blood circulation, stimulates the metabolism and delivers heightened energy levels.

Can be used everywhere excellent revenue generator

- Minimum space requirement
- No changing necessary
- Contactless and hygienic
- Can be used at any time
- Self-explanatory operation
- No direct staff costs
- Wide appeal to all target groups
- Fits the Wellness & Health profile
- Target new user groups
- Enhanced customer loyalty
- Additional health literacy
- Spa experience differentiation

Use the power of relaxation anywhere

The dry water massage by Wellssystem can be used anywhere where people are looking for rest and relaxation. An area of just 2.5m² is sufficient to offer your customers this wellness experience. The application is very easy and can be done without changing, without showers, without long waiting times and above all without increased personnel expenditure.

High profitability and customer loyalty

According to a DAK* health study, 75% of working people suffer from back pain on a regular basis - and the number is rising. Stress is often referred to as a widespread disease. The many positive effects of dry water massage to the body and mind ensures its appeal to a wide audience. Inspire your clients' wellbeing with Wellssystem and imagine the additional revenue to be generated. Minimum space requirements, low operating costs and fully automatic application without additional personnel costs enable high return on investment margins. Flexible payment options with interfaces to standard commercial control systems offer various options for integrating Wellssystem into your business model. For example, cash payments, monthly subscriptions or as an additional incentive for your existing premium offers.

* DAK is one of Germany's largest statutory health insurers.

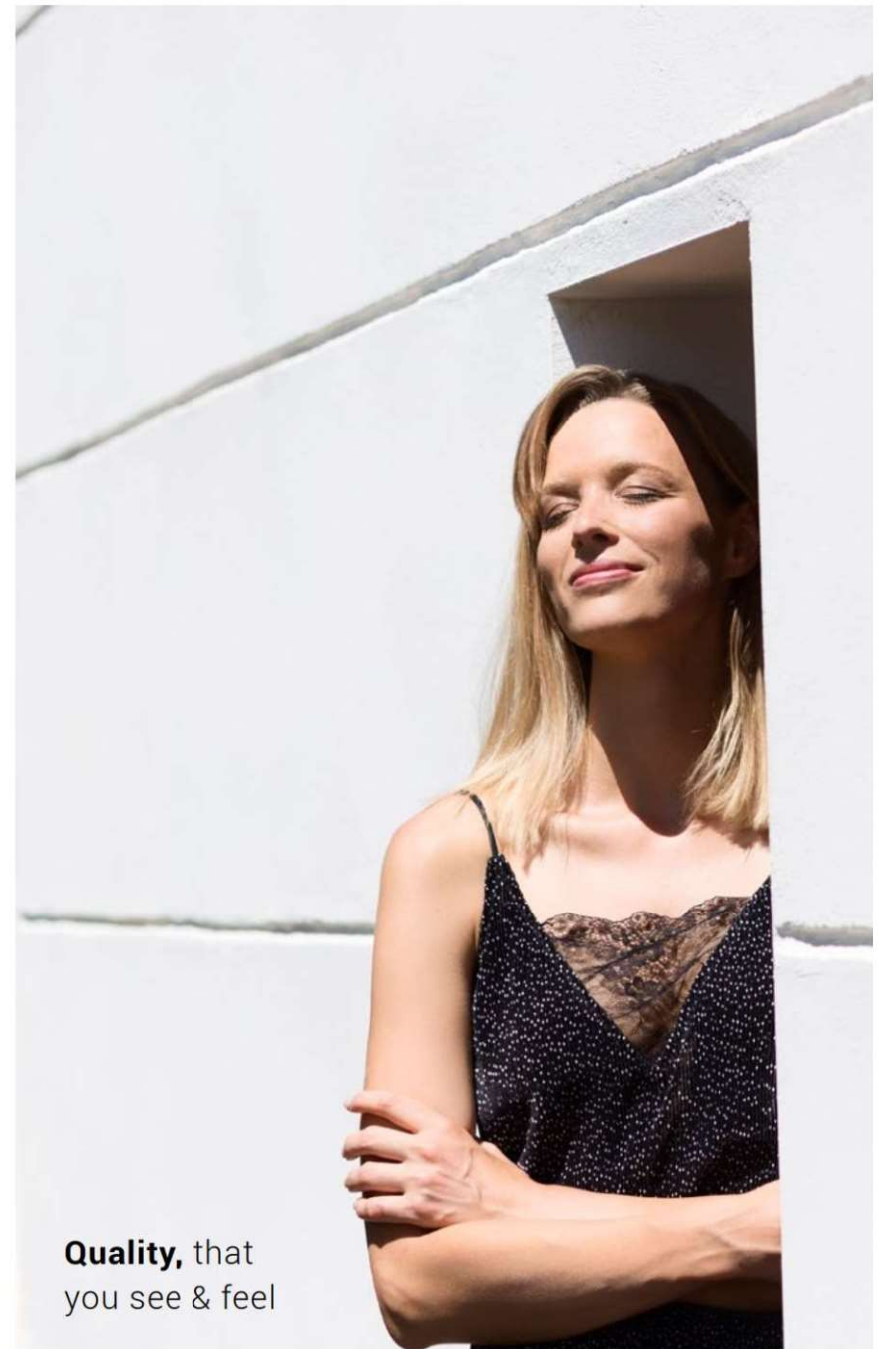

Wellsystem Wave_Touch

The future of dry water massage

With the Wave_Touch, Wellsystem heralds a new era of relaxation. The exceptionally effective massage can be individually adjusted and offers the perfect massage experience for every user. Take your customers into a unique relaxation world of light and colour with the Wave_Touch and Spa_Complete.

experience
more

Quality, that
you see & feel

Effective massage for strong shoulders

The shoulder muscle (musculus trapezius) is an essential predictor of mental stress and, when hardened by a tense posture, causes pain and tension throughout the body. The specially shaped surface of the Wellsystem, which ergonomically surrounds the shoulder and neck area with its wave shape, allows the massage jet to move around the entire shoulder muscles. This provides a comprehensive massage of the musculus trapezius. Innovative jets deliver an intense massage experience. For an unrivalled, highly effective shoulder massage.

The Wellsystem Wave_Touch offers massage programmes developed with multiple experts, which can be individually adjusted to body size and shoulder width.

Healthy back

Relieves tension and strengthens the back

Strong shoulders

Ideal for tense shoulders and neck

Pure relaxation

A feel-good massage for the whole body

Fit legs

Makes tired and heavy feeling legs fit again

Energy boost

Full body massage for enhanced energy levels

contactless &
hygienic

Spa_Complete

Relax with all your senses

The Spa_Complete is love at first sight. The spa fits perfectly into the design of the Wave_Touch and invites you to take a relaxing break with its ambient lighting and spacious interior. Make the dry water massage a feel-good experience for all senses.

Colours and light can increase wellbeing and have numerous positive effects on the body and mind. The new LED colour light programmes and the skin-caring LED Radiance were developed together with a leading lighting biologist.

RELAX: After a stressful day at work or physical exertion, the green Relax light helps you to relax and feel completely at ease.

RECHARGE: Coloured light with optimally visible orange-red is ideal for re-charging batteries and re-charging energy, for example after physical exertion.

ACTIVATE The sky-blue Activate light brightens the mood and activates body and mind.

RAINBOW With Rainbow you can experience all the colours of the rainbow one after the other during the massage and discover the effect of each colour.

Skin caring Radiance

The intensive skin caring Radiance increases the body's own production of collagen. Wrinkles are reduced, the skin is tightened and the overall skin texture can visibly improve with regular use. In contrast to the coloured light programmes, the eyes should remain closed when using the skin caring Radiance. Additional safety glasses are not necessary as the brightness of all colour light programmes can be adjusted by the user at any time.

Individual musical enjoyment and meditative sounds

The high-quality sound system with integrated SD card and Bluetooth® Connect complements the massage with relaxing music and meditative sounds. The user also receives information on the light colour programme used. If desired, the user's own smartphone can easily be connected via Bluetooth® so that everyone can enjoy their own favorite music, podcasts or relaxation courses. The music is controlled via the large touch-screen display.

Aromatic fragrances transport you into a world of relaxation

With special aromatic scents, the massage becomes a complete feel-good experience. The intensity of the fragrance can be individually adjusted. In addition to the internal aroma, you have the option to offer your customers individual aroma sticks. The aroma sticks are simply inserted into the slot provided to enjoy your favourite scent of choice.

Limitless possibilities

Large touch-screen display Intuitive operation

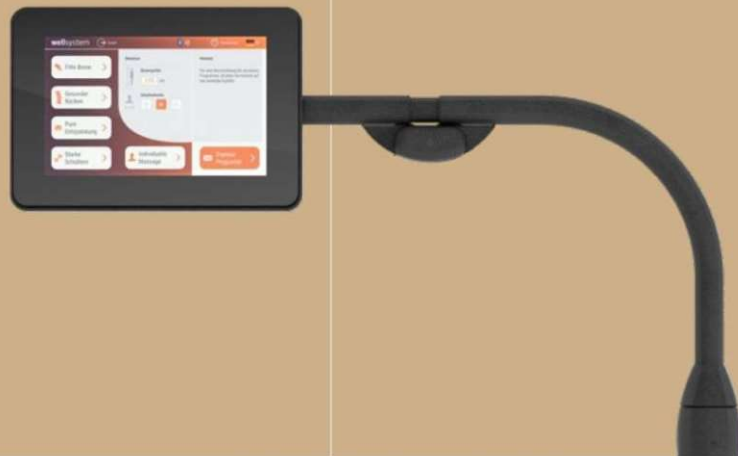

The simple operation in the large, rotatable touch-screen display offers you and your customers limitless user possibilities. In stand-by mode, a short instruction video explains important features and provides tips for an incomparable massage experience. The user can start with adjusting the settings to enjoy total relaxation during the session. All settings can also be changed at any time during the massage, simply and intuitively.

Professional Set-up Manager: individual setting options & easy service

The Professional Set-up Manager delivers completely new operational benefits. With just a few clicks, you can configure massage times, payment options, quick-start buttons, spa settings and effect lighting, and read out all device information.

NFC Connect

Today NFC is the standard for contactless payment. With the NFC Connect interface, credits and massage programmes are transferred to individual NFC cards simply, securely and contact free.

Lots of advantages for your customers

- Intuitive and simple operation
- Extensive and individual settings
- An instruction video explains the most important functions
- All settings can be pre-selected
- Perfect ergonomics: touch-screen display can be rotated and tilted

Wellsystem is a part of the JK Group

With the invention of the Hydrojet as the world's first dry water massage system, Wellsystem has created a completely new product group that has become an integral part of the health and wellness industry.

Quality "Made in Germany" products, with regular innovations, professional marketing and a comprehensive service network have made Wellsystem the market leader. The high level of customer satisfaction has already been recognised numerous times by multiple awards in customer satisfaction.

As part of the JK Group, which exports to over 50 countries, Wellsystem has access to comprehensive know-how with its own development centre. Individual financing concepts such as rental and leasing offers make the decision for Wellsystem even easier.

Tip: Use the marketing download area for simple and professional advertising. You can obtain the free access code from your Wellsystem partner.
